

Tripot

The Tripot is a new lightweight and versatile family of stools. It is our first collaboration with acclaimed French designer Inga Sempé.

The stools are made with great attention to detail and the design itself brings out the craftsmanship thru its elegant shape.

They come in natural ash and black lacquer, and are available in three different heights to suite both domestic and contract requirements.

Tripot has a strong personality, with its 3 legs and triangular seat, it will light up any context with its charismatic nature.
